

Mono-Crystalline Solar Panel

This mono-crystalline solar panel ensures high and stable conversion efficiency. Its sturdy construction uses tempered front glass and an anodized aluminum frame for reliable operation in diverse mounting configurations.

Product Overview

High-Efficiency Mono-Crystalline Modules

These mono-crystalline solar modules offer high and stable conversion efficiency, backed by over 8 years of professional experience. Designed for reliability, they feature a guaranteed 0 to +3% output power tolerance and robust construction using tempered front glass and an anodized aluminum frame. They are built to operate reliably in various mounting configurations while maintaining an attractive appearance.

Performance & Quality

Certifications & Compliance	ISO9001:2000, IEC61215, IEC61730, CE
Output Power Warranty	25 Years
Output Power Tolerance	0 to +3%

Construction

Key Materials

- Tempered front glass
- Anodized aluminum frame
