

Motorcycle Air Conditioning Compressor

This air conditioning compressor unit is designed for motorcycle applications. It features a multi-groove pulley for efficient power transfer and a durable metallic housing.

Product Overview

High-Performance Cooling Solution

This compact and robust air conditioning compressor is specifically engineered for motorcycle applications, ensuring reliable climate control in demanding environments. Designed with a durable metallic housing and a multi-groove pulley, it facilitates efficient power transfer and consistent cooling performance. It serves as a vital component for maintaining rider comfort during long journeys or in high-temperature conditions.

Technical Specifications

Performance

Reliable Cooling • High Durability

Application

Motorcycle

Key Features

Multi-groove pulley, Metallic housing, Compact design, Refrigerant compatible

Housing Material

Metal
