

Motorcycle Analog Speedometer Instrument Cluster

This motorcycle instrument panel features an analog speedometer and a fuel gauge. The speedometer displays a range from 0 to 160 km/h, while the fuel gauge indicates fuel level.

Product Overview

High-Quality Analog Instrumentation

This motorcycle instrument cluster features a robust analog speedometer designed for clear readability and reliable performance. With a classic design, it includes an integrated odometer and a dedicated fuel gauge, providing essential riding data at a glance. The clear housing and textured background ensure durability and a professional aesthetic suitable for various motorcycle models.
