

Motorcycle Battery with Capacity Detection

This motorcycle battery features a built-in electronic chip for real-time capacity monitoring. Its maintenance-free design and gel electrolyte ensure reliable power and extended service life.

Product Overview

Intelligent Motorcycle Battery Technology

This maintenance-free motorcycle battery features an exclusive patented design with a built-in electronic chip for real-time capacity monitoring. Engineered with Pb-Ca grid alloy, it offers low water loss and a low self-discharge rate for extended service life. The gel electrolyte injection ensures superior performance across a wide temperature range, providing a reliable power solution that is ready for immediate use without the need for initial acid filling.

Technical Specifications

Model	YT12B-4(iGEL)
Rated Voltage	12 V
Capacity	10 Ah
CCA	100

Performance & Charging

Operating Temperature Range	-30°C to 55°C
Standard Charge	1.0A for 5-10 hours
Rapid Charge	10.0A for 30 minutes
Charge Voltage Range	13.8V - 15.0V

Features

Key Features

Capacity Detection • Maintenance Free • Gel Electrolyte • Non-Spillable • Factory Sealed • Patented Design
