

Motorcycle Chain and Sprocket Kit

This motorcycle chain and sprocket kit is designed for optimal power transmission and durability. The kit includes a precision-engineered sprocket made from hardened steel and a high-strength chain for reliable performance.

Product Overview

High-Performance Drivetrain Solution

This motorcycle chain and sprocket kit is engineered for optimal power transfer and long-term durability. Featuring precision-machined sprockets with hardened teeth and a high-strength, pre-stretched chain, the system is designed to minimize maintenance while maximizing efficiency. It provides a reliable upgrade for various motorcycle models, ensuring smooth engagement and resistance to wear under demanding riding conditions.

Technical Specifications

Key Features

- Precision-machined sprocket teeth
- Hardened for extended wear resistance
- Pre-stretched chain to minimize initial elongation
- Weight-reduction cutouts on sprocket
- Surface treated for corrosion resistance

Material Construction

Hardened Steel, High-Quality Steel Alloy, Corrosion Resistant
