

Motorcycle Clutch Friction Plate for CD70

This motorcycle clutch plate is engineered for optimal power transmission and smooth gear changes. Its durable friction materials offer extended lifespan and resistance to wear.

Product Overview

High-Performance Clutch Friction Plate

This high-performance clutch friction plate is engineered for optimal power transmission and smooth gear shifting in motorcycle applications. Manufactured using premium A-class rubber and cork-based materials, it offers exceptional durability and resistance to wear under demanding riding conditions. Designed to meet or exceed OEM specifications, this component ensures reliable performance and broad compatibility across various motorcycle models.

Technical Specifications

Outer Diameter	95.6 mm
Inner Diameter	63.5 mm
Thickness	3.7 mm
Material	A-class rubber and cork-based

Compliance

Certifications

ISO/TS16949

Compatibility

Compatible Models

- CG125
- CG150
- GS125
- GN125
- RX125
- RS100
- YB100
- AX100
- CY80
- Y110
- GN250
- JH70
- BOXER
- PULSAR
- CJ90
- KRISS
- VICTOR
