

Motorcycle Drive Sprocket

This motorcycle drive sprocket is engineered for optimal power transfer and lasting durability. Constructed from CNC-machined 7075-T6 aluminum alloy, it provides exceptional strength while minimizing weight.

Product Overview

High-Performance Drive Sprocket

This motorcycle drive sprocket is precision-engineered for optimal power transfer and long-term durability. Constructed from high-grade 7075-T6 aluminum alloy, it offers an exceptional strength-to-weight ratio suitable for demanding racing and high-performance applications. The CNC-machined finish ensures accurate fitment and smooth operation, while the anodized surface provides superior corrosion resistance and a professional aesthetic.

Technical Specifications

Finish

Anodized • Corrosion Resistant

Material

7075-T6 Aluminum Alloy

Manufacturing

CNC Machined

Application

Best For

Racing, High-Performance, Power Transfer
