

Motorcycle Drive Sprocket

This motorcycle drive sprocket ensures optimal power transfer and durability. Constructed from high-strength materials, its precision-engineered tooth profile minimizes wear and maximizes chain engagement.

Product Overview

High-Performance Drive Sprocket

This high-performance motorcycle drive sprocket is precision-engineered to deliver optimal power transfer and exceptional durability. Constructed with heat-treated, high-strength materials, it features a specialized tooth profile designed for smooth chain engagement and reduced wear. The lightweight alloy design helps minimize rotational mass, contributing to improved acceleration and overall riding performance in both street and track conditions.

Technical Specifications

Tooth Count	36 T
Material Grade	1045 Steel
Key Features	Heat-Treated, Lightweight Alloy, Corrosion Resistant, Precision Engineered
