

Motorcycle Drum Brake Hub Assembly

This motorcycle brake hub assembly is designed for drum brake systems. It is finished in silver and includes the brake lever mechanism.

General Overview

High-Performance Drum Brake Hub

The WY100 motorcycle drum brake hub assembly is engineered for reliable stopping power and consistent performance. Designed for seamless integration with rear wheel drum brake systems, this assembly includes the essential brake lever mechanism for immediate functionality. Its robust silver finish ensures durability against environmental factors, making it an ideal choice for maintenance and repair requirements.
