

Motorcycle Engine Air Intake Hose

Flexible corrugated rubber air intake hoses are designed for motorcycle engine air filtration systems. Stainless steel clamps ensure a secure connection, preventing leaks and maintaining optimal engine performance.

Product Overview

High-Performance Air Intake Solution

This motorcycle engine air intake hose is engineered for optimal airflow and reliable engine performance. Featuring a flexible, corrugated design, it ensures a secure connection within the air filtration system while effectively preventing leaks. Built to withstand harsh automotive environments, the hose is resistant to heat, oil, and various automotive fluids, making it a durable choice for maintenance and repair.

Technical Specifications

Included Components

- Air Intake Hose
- Stainless Steel Clamps

Material	Rubber
Design Features	Corrugated, Flexible, Heat-Resistant, Oil-Resistant

Performance Metrics
