

Motorcycle Engine Cylinder Block

High-performance cylinder block designed for motorcycle engines. It features enhanced cooling fins for optimal heat dissipation and precision-machined surfaces for improved sealing and combustion efficiency.

Product Overview

High-Performance Motorcycle Cylinder Block

This high-performance cylinder block is engineered for enhanced engine reliability and power output. Constructed from high-quality aluminum alloy, the unit features precision-machined surfaces that ensure superior sealing and combustion efficiency. Advanced cooling fin designs are integrated to provide optimal thermal management, ensuring the engine maintains stable operating temperatures even under demanding conditions.

Compatibility & Fitment

Compatible Motorcycle Models

- AX100
- ECO100
- CG125
- GY6
- AKT125
- 110-2
- BOXER100

Technical Construction

Key Features

Enhanced Cooling Fins • Precision-Machined Surfaces • High Thermal Resistance • Wear Resistant

Material

Aluminum Alloy, Cast Metal

Engine Type Compatibility

Two-stroke compatible (includes reed valve assembly)
