

Motorcycle Engine Housing Cover

This metallic motorcycle part serves as an engine housing cover. It features a circular section with intersecting slots and various mounting points.

Product Overview

Precision-Engineered Engine Housing

This motorcycle engine housing cover is designed for durability and precise fitment within the engine or transmission system. Crafted from high-quality cast aluminum alloy, it features a complex geometric design with integrated mounting points to ensure structural integrity. Its robust construction provides essential protection and support for internal components, making it a reliable choice for maintenance and repair applications.

Technical Specifications

Design Features

- Circular ventilation or access slots
- Multiple integrated mounting points
- Complex geometric casting

Material	Cast Aluminum Alloy
Application Area	Engine System, Transmission System, Motorcycle Housing
