

Motorcycle Engine Oil Pump Assembly

This motorcycle engine oil pump assembly is designed for efficient oil circulation. It features a cast metal pump housing and a durable plastic gear.

Product Overview

High-Performance Oil Pump Assembly

This motorcycle engine oil pump and gear assembly is engineered for reliable and efficient oil circulation within the engine system. Built to national standards, it features robust construction with anti-aging properties and strong abrasion resistance, ensuring a long working life. The assembly is suitable for maintenance and repair applications, with sample orders accepted for evaluation purposes.

Key Features

Performance Benefits

Long-lasting • Anti-aging • Abrasion Resistant

Quality Compliance

National Standard, Quality Guaranteed
