

Motorcycle Engine with Electric Starter

This motorcycle engine is designed for optimal power and durability. It features cooling fins, an electric starter, and a CDI unit for reliable performance, ensuring a smooth riding experience.

Product Overview

High-Performance Motorcycle Engine

This high-performance motorcycle engine is engineered for reliability and durability across various applications. Featuring a robust construction with integrated cooling fins, it ensures efficient heat dissipation during operation. Equipped with an electric starter and a CDI unit, this engine provides consistent ignition and smooth power delivery for a superior riding experience.

Technical Specifications

Ignition System

CDI • Electric Starter

Model Number	DY156FMI-2
Serial Number	04641536

Design Features

Cooling Type	Air-cooled (via cooling fins)
