

Motorcycle Front Shock Absorber

This motorcycle front shock absorber provides superior damping and control for a comfortable ride. It enhances vehicle stability and handling.

Product Overview

High-Performance Damping Solution

This front shock absorber is precision-engineered for CD156 motorcycle models, focusing on delivering superior damping control and vehicle stability. Constructed from durable, high-grade materials, it ensures long-lasting reliability even under demanding riding conditions. It is an ideal solution for upgrading handling performance or replacing worn-out factory components to restore a smooth, comfortable ride.

Compatibility & Application

Compatible Model	CD156
Application Type	Replacement, Performance Upgrade

Key Features

Performance Benefits

- Superior damping control
- Enhanced vehicle stability
- Improved handling precision
- Increased ride comfort

Quality Standards

OEM Specification Compliant • Durable Construction
