

Motorcycle Front Shock Absorber

This motorcycle front shock absorber provides enhanced stability and ride comfort. It features durable construction and optimized damping characteristics.

Product Overview

High-Performance Suspension Solution

This front shock absorber is engineered to deliver superior stability and ride comfort for a wide range of motorcycle applications. Featuring durable construction and optimized damping characteristics, it ensures consistent responsiveness and control across diverse road conditions. The inclusion of a protective rubber boot helps prevent contamination, ensuring long-lasting durability and reliable performance for professional riders.

Technical Features

Key Features

- Optimized damping characteristics
- Protective rubber boot included
- Durable construction
- Enhanced stability and ride comfort

Application Suitability

Versatile Fit • Road Use

Performance Attributes

High-Performance, Contamination Resistant, Responsive Handling
