

Motorcycle Front Shock Absorber for EN125

This front shock absorber is designed for the EN125 motorcycle. It provides superior damping and control for a smooth driving experience.

Product Overview

High-Performance Suspension

These front shock absorbers are engineered specifically for the EN125 model to deliver enhanced stability and superior ride comfort. Featuring a robust construction, they include a chrome-finished upper tube for durability and a protective rubber boot designed to prevent debris ingress. This component ensures secure attachment and reliable damping for a smooth and controlled driving experience.
