

Motorcycle Shock Absorber for Ride Comfort and Handling

These high-performance motorcycle shock absorbers are designed for superior ride comfort and handling. They feature durable construction with a chrome-finished shaft and a black spring, providing excellent damping and stability.

Product Overview

Enhanced Ride Comfort and Stability

These high-performance motorcycle shock absorbers are engineered to deliver superior ride comfort and handling for a wide range of motorcycles. Featuring a durable construction with a chrome-finished shaft and a robust black spring, they provide excellent damping characteristics. This design effectively reduces road vibrations and improves overall vehicle control, making them an ideal upgrade for riders seeking better performance and safety.

Technical Specifications

Performance Benefits

- Superior ride comfort
- Improved handling
- Excellent damping
- Enhanced stability
- Vibration reduction

Primary Application

Performance Upgrade • Safety Enhancement

Component Finish

Chrome-finished shaft, Black spring
