

Motorcycle Spark Plug with Titanized Surface

This motorcycle spark plug features a titanized surface for enhanced durability. Its design ensures excellent working performance and a long service life.

Product Overview

High-Performance Spark Plug

This motorcycle spark plug features a durable titanized surface designed for extended service life and excellent working performance. Engineered with a multi-ribbed insulator and a 95% pure alumina construction, it offers superior insulation and electrical features. The design includes a copper core electrode for enhanced heat dissipation, ensuring consistent ignition and engine protection.

Technical Specifications

Insulator Material	95% Pure Alumina
Housing Finish	Nickel-plated
Surface Treatment	Titanized
Available Models	F7TC, E8TC, E6TC, D8TC

Key Features

Design Benefits

- Multi-ribbed insulator eliminates flash over
- Nickel plated housing prevents oxidation and corrosion
- Heat crimping process ensures absolute gas-tight fit
- Inner sealing with conductive glass for fine conductivity
- Multi-layer gaskets provide strong elasticity and reliable sealing
- Copper core electrode improves heat dissipation
