

Motorcycle Speedometer Tachometer Gauge Cluster

This is a complete gauge cluster for motorcycles, featuring both a speedometer and a tachometer. The cluster includes indicator lights and wiring harnesses for electrical integration, mounted on a black bracket for secure attachment.

Overview

Integrated Motorcycle Gauge Cluster

This comprehensive motorcycle gauge cluster combines essential instrumentation into a single, durable assembly. Featuring both an analog speedometer and a tachometer, it provides real-time monitoring of critical riding metrics. Designed for easy installation, the unit includes pre-wired harnesses and a secure mounting bracket, making it an ideal solution for maintenance or upgrade projects.

Instrumentation

Tachometer Range

0 x1000r/min
Min RPM

12 x1000r/min
Max RPM

Speedometer Range

120 km/h

Indicator Lights

Neutral (N), Headlights

Technical Details

Mounting System

Black metal bracket

Connection Type

Multi-pin wiring harness
