

Motorcycle Sprocket 38T for EN125

This high-strength steel sprocket is designed for EN125 motorcycle models. It features a 38-tooth configuration for optimal power transfer and durability.

Product Overview

High-Performance Sprocket for EN125

This high-strength steel sprocket is precision-engineered specifically for EN125 motorcycle models. Featuring a 38-tooth configuration, it is designed to optimize power transfer while minimizing chain wear. Built to meet or exceed OEM specifications, this component offers a reliable solution for both routine maintenance and performance upgrades.

Technical Specifications

Reference Codes

- C-406
- J1611301

Material Grade

High-Strength Steel

Tooth Count

38 T

Compatible Models

EN125
