Product Overview

Precision Steering Solution for Monkey Bikes

This steering head and stem assembly is engineered for Monkey motorcycle frames, providing a critical interface between the forks and the chassis. It is manufactured with a high-quality chrome-plated finish to ensure long-term durability and resistance to environmental corrosion. Designed for seamless integration, this component facilitates smooth and reliable steering performance.

Technical Specifications

Steering Pipe Hole	32 mm
Comparison to Standard	Note: Standard size for Monkey bikes is 25.5mm; this unit features an upgraded 32mm hole diameter.
