

Motorcycle Swingarm Assembly

This motorcycle swingarm assembly is a crucial component of the rear suspension system. Constructed from a metal alloy, it provides mounting points for the rear wheel axle and shock absorber.

Product Overview

High-Performance Swingarm Assembly

This motorcycle swingarm assembly serves as a critical component of the rear suspension system, designed for durability and smooth operation. Engineered with a robust dual-sided metal alloy construction, it provides the structural integrity required for reliable handling. The assembly includes integrated mounting points for the rear wheel axle, shock absorber, and essential braking and drivetrain components.

Technical Specifications

Material Type	Metal Alloy (Steel or Aluminum)
Design Configuration	Dual-sided
Surface Treatment	Corrosion-resistant protective coating
Key Features	Rear Suspension, Pivot Bushings, Integrated Mounting Points

Compatibility & Mounting

Component Mounting

- Rear wheel axle
- Shock absorber
- Brake caliper
- Chain guide
