Product Overview

High-Performance Motorcycle Tires

These high-performance motorcycle tires are engineered for optimal grip, stability, and durability across diverse riding conditions. Constructed with a high-quality rubber compound and reinforced sidewalls, they provide reliable traction and handling on both wet and dry surfaces. Available in a wide array of sizes and ply ratings, these tires are suitable for various motorcycle models, supporting both on-road and off-road applications.

Key Features

Performance Highlights

High-Performance Rubber Compound, Reinforced Sidewalls, Robust Tread Pattern, Enhanced Traction, On-Road and Off-Road Compatible

Technical Specifications

Tire Types

T/T (Tube Type) • T/L (Tubeless)

Size and Rating Availability

Size	Typical Ply/Load Rating
2.50-17	4, 6, 8PR
3.00-18	4, 6, 8PR
2.75-18	4, 6, 8PR
3.50-10	4, 6, 8PR
110/90-12	64J
130/90-10	61J
120/70-12	56J
130/70-12	58J
4.00-10	4, 6PR
