Overview

Advanced Multi-Agent Suppression Capability

This specialized fire tender is engineered for versatile firefighting operations, capable of deploying multiple agents including dry powder and foam. Designed for high-risk environments, it provides effective suppression for flammable liquids, gas fires, and ordinary combustible materials. Its robust construction and multi-compartment design ensure that essential tools and equipment are readily available for rapid emergency response.

Technical Specifications

Extinguishing Systems

- Dry Powder System
- Foam System
- Water System

Key Vehicle Features

- Multi-compartment equipment storage
- High-capacity water tank
- Powerful pump system
- Emergency lighting and sirens
- High-visibility safety markings

Primary Applications

Public Security, Petroleum Industry, Chemical Plants, Fuel Depots, Industrial Facilities, Airports

Performance Metrics

Model Designation

WFPT 9000
