

Multi-Color LED Light Bar for Emergency Vehicles

This LED light bar provides high-intensity lighting for emergency and security applications. It features multiple LED colors including red, blue, amber, white, and green.

Overview

High-Intensity Emergency Lighting

The LTF8300 LED light bar is a high-intensity lighting solution engineered specifically for emergency and security vehicle applications. Featuring a versatile multi-color configuration with blue, white, and red sections, this unit ensures maximum visibility in critical situations. Its durable housing and lens construction are designed to withstand harsh environmental conditions, while the advanced LED technology provides long operational life and low power consumption.

Technical Specifications

Durability Features

Durable Housing • High-Intensity LEDs • Weather Resistant

Voltage Input	12-24V DC
Available Colors	Blue, White, Red
Installation Compatibility	Universal fit for various vehicle types
