

Multi-Core Natural and Neoprene Rubber Cable

This multi-core cable features copper conductors insulated with color-coded natural rubber and sheathed with neoprene rubber. Designed for flexible power and control applications, this cable offers excellent resistance to abrasion, oil, and chemicals.

Product Overview

Durable Multi-Core Rubber Cable

These tough rubber-sheathed cables are engineered to conform to IEC standards, ensuring reliability in demanding environments. Designed for versatility, they are suitable for both outdoor and wet conditions, making them ideal for a wide range of applications from lightweight workshop tools to heavy-duty industrial equipment. The multi-core construction features high-quality insulation and protective sheathing for long-term performance.

Technical Standards

Suitable Environments

- Outdoor use
- Wet conditions
- Workshop environments
- Industrial settings
