

Multi-Leaf Vehicle Suspension Spring

This multi-leaf spring is designed for vehicle suspension systems. Constructed from multiple layers of steel leaves, it provides variable stiffness and load-bearing capacity.

Product Overview

Professional Multi-Leaf Suspension Solution

This multi-leaf vehicle suspension spring is engineered to provide reliable performance and variable stiffness for demanding automotive applications. Constructed from high-quality steel layers, the design ensures robust load-bearing capacity and enhanced vehicle stability. The assembly includes specialized eyes for frame attachment and protective coatings to maximize durability and resist environmental corrosion.

Design and Compatibility

Component Identifier

CS-TM

Application Compatibility

Heavy-Duty, Automotive, Armored Vehicle

Construction

Key Construction Features

- Multiple layered steel leaves
- Progressive spring rate design
- Corrosion-resistant protective coating
- Integrated eye attachment points
