

Multi-Needle Industrial Embroidery Machine

This industrial embroidery machine is designed for high-speed, multi-needle stitching on textiles. It features automated thread control and precision needle positioning for intricate designs.

Overview

High-Performance Embroidery

This industrial multi-needle embroidery machine is engineered for high-speed textile production and complex stitching applications. It features a robust, durable frame and advanced automated thread control to ensure consistent quality in mass production environments. Integrated precision needle positioning allows for the execution of intricate designs with exceptional accuracy and reliability.

Technical Features

Core Capabilities

High-Speed Stitching, Multi-Needle Configuration, Automated Thread Control, Precision Positioning

Operational Control

Interface & Monitoring

- User-friendly pattern programming
- Real-time embroidery process monitoring

Applications

Suitable Applications

Mass Production • Custom Embroidery
