

Multi-Story Logistics Hub

This modern logistics hub features a multi-story design with a glass and concrete facade. It is equipped with multiple windows for natural light and ventilation.

Overview

Integrated Logistics Engineering

This Multi-Story Logistics Hub solution offers comprehensive engineering design and contracting services for complex distribution environments. The system integrates advanced logistics technology with specific geographical and regional requirements to ensure unobstructed flow and efficient classification. Designed for scalability, it supports the transition from single-system operations to fully integrated, three-dimensional logistics frameworks.

Capabilities

Supported Logistics Systems

- Air Freight Systems
- Airline Catering
- Baggage Sorting & Transmission
- Logistics Distribution Systems
- Automated Warehouse Solutions
- Automated Grading Systems
- Vacuum Conveying Systems
- Specialized Warehouse Planning
- Logistics Park Planning

Scope of Services

Technology Consulting, Project Design, Project Contracting, Project Management

Experience

Industry Experience

20 Years

Years of Operation
