

Multistage Centrifugal Water Pump

This centrifugal pump is designed for water pumping in diverse sectors, including civil, industrial, and agricultural. It is also suitable for hot and cold water circulation, pressure boosting, and irrigation.

Product Overview

Multistage Centrifugal Water Pump

This multistage centrifugal water pump is a robust and efficient solution engineered for reliable performance in industrial, commercial, and residential fluid transfer applications. Featuring high-quality construction materials like cast iron and stainless steel, it ensures excellent corrosion resistance and long-term durability. Its multistage design delivers consistent, high-pressure output, making it ideal for water boosting, irrigation, and HVAC systems.

Operating Limits

Max Suction Lift	8 m
Max Operating Pressure	8 bar
Max Ambient Temperature	40 °C
Max Liquid Temperature	90 °C
Max Altitude	1000 m

Technical Specifications

Materials of Construction

Component	Material
Pump Body	Cast Iron
Impeller	Brass / PPO / Noryl
Motor Shaft	AISI1045
Mechanical Seal	NBR / Graphite / Ceramic

Compliance

International Standards	IEC60034-1, IEC 335-1, IEC 34-1, ISO 2548
