

Music Box Mechanism with Trumpet and Buzzer

This miniature music box mechanism incorporates both a trumpet and a buzzer. It is designed for integration into a variety of musical devices and applications.

Product Overview

Professional Music Box Mechanism

This specialized music box mechanism integrates both a trumpet and buzzer for versatile audio output in compact designs. Engineered for precision, it features a standardized M3.5-6g mounting system, making it suitable for seamless integration into various small-scale mechanical or decorative assemblies. This mechanism is built for reliability, providing consistent performance for technical applications where space is at a premium.

Mechanical Dimensions

| | |
|----------------------------|---------|
| Overall Height | 51.5 mm |
| Primary Width | 21.7 mm |
| Secondary Width | 17 mm |
| Screw Thread Specification | M3.5-6g |

Key Metrics

Component Overview

| | |
|---------------------------------|------------------------------|
| 1 unit Trumpet Output | 1 unit Buzzer Unit |
|---------------------------------|------------------------------|

Key Dimensions Reference

| Parameter | Value |
|--------------------|-------|
| Overall Height | 51.5 |
| Primary Width | 21.7 |
| Secondary Width | 17 |
| Reference Length A | 44.5 |
| Reference Length B | 36 |
