

NEMA 5-15P Power Cord

This power cord features a NEMA 5-15P plug, suitable for standard wall outlets in North America. It has two flat blades and a U-shaped grounding pin.

Overview

Professional Grade NEMA 5-15P Power Solution

This NEMA 5-15P power cord is engineered for reliable performance in standard North American three-prong applications. With a robust 15A/125V rating and multiple safety certifications, it ensures safe and consistent power delivery for a wide range of electrical appliances. Designed for industrial and commercial versatility, the cord supports various IEC connector types and cable configurations to meet diverse project requirements.
