

Network Switch with LED Indicators

This network switch provides network connectivity for various devices. It features LED indicators for monitoring network activity and a compact design for easy installation.

Product Overview

Compact Network Connectivity

This network switch provides a streamlined solution for managing data traffic in professional office environments. Featuring a durable, compact enclosure with integrated heat dissipation, it ensures reliable performance during continuous operation. The device includes clear LED status indicators for real-time monitoring of connectivity and power, making it an essential component for efficient network management.

Technical Specifications

Device Type	Network Switch
Status Indicators	LED Indicators, Power Status, Connectivity Status

Design & Build

Enclosure Design

- Compact form factor
- Ribbed sides for heat dissipation
- Visible mounting screws

Color

Black

Physical Controls	Yes
