

Ni-MH AAA Rechargeable Battery 1.2V 1000mAh

This is an environmentally friendly rechargeable battery. It is designed for various electronic devices and features a long lifespan and consistent power output.

Product Overview

High-Performance Rechargeable Power

These Ni-MH AAA rechargeable batteries are designed as an environmentally friendly power solution for a wide range of electronic devices. With a capacity of 1000mAh and a consistent 1.2V output, they offer a reliable and long-lasting energy source. They are an ideal choice for everyday electronics such as cameras, remote controls, and other small portable devices, helping to reduce waste through reusability.

Technical Specifications

Key Performance Metrics

1.2 V Voltage	1000 mAh Capacity
-------------------------	-----------------------------

Battery Chemistry	Nickel-Metal Hydride (Ni-MH)
Size Format	AAA

Features

Eco-Friendly Status

Rechargeable • Environmentally Friendly

Ideal Applications	Cameras, Remote Controls, Small Electronics
