

# Ni-MH Rechargeable Battery 1.2V 3000mAh

This is a high-capacity rechargeable Ni-MH battery. It features 1.2V and 3000mAh, making it suitable for various electronic devices requiring reliable and long-lasting power.

## Product Overview

### High-Capacity Rechargeable Power

This Ni-MH rechargeable battery is engineered to deliver reliable and long-lasting power for a wide range of electronic devices. With a robust 3000mAh capacity and a stable 1.2V output, it provides a dependable energy solution for applications requiring consistent performance. Its rechargeable nature ensures cost-effectiveness and reduces waste, making it an ideal choice for professional and industrial equipment.

## Technical Specifications

### Rated Voltage

**1.2 V**

Voltage

### Rated Capacity

**3000 mAh**

Capacity

### Battery Type

Rechargeable • SC Size

### Battery Chemistry

Ni-MH (Nickel-Metal Hydride)
