

Ni-MH Rechargeable Battery Pack 4.8V 550mAh

This is a CEL Ni-MH rechargeable battery pack with a voltage of 4.8V and a capacity of 550mAh. It is important to note the polarity and avoid reverse assembly to prevent short circuits.

Overview

Reliable Ni-MH Power Solution

This 4.8V Ni-MH rechargeable battery pack offers a consistent 550mAh capacity, making it an ideal power source for various professional and industrial applications. Designed with safety in mind, the pack features clear polarity marking to ensure correct installation and prevent short circuits. Its Nickel-Metal Hydride chemistry provides a reliable and environmentally conscious alternative to traditional disposable batteries.

Safety & Compliance

Safety Instructions

- Do not assemble reversely
- Ensure correct polarity during installation
- Prevent short circuits
- Recyclable components

Sustainability

Recyclable, Nickel-Metal Hydride
