

Nitrile Coated Work Gloves

These work gloves feature a nitrile coating for enhanced grip and durability. They provide hand protection in various work environments and general purpose applications.

Product Overview

Professional Nitrile Coated Safety Gloves

These blue nitrile-coated work gloves are engineered to provide superior hand protection and durability in demanding work environments. The specialized coating offers excellent resistance to abrasion, punctures, and certain chemicals, ensuring safety without sacrificing dexterity. Designed for comfort and reliability, they are an ideal choice for general-purpose applications requiring a secure grip and long-lasting performance.

Technical Specifications

Coating Material	Nitrile
Color	Blue

Performance Features

Application Suitability

General Purpose • Industrial • Construction

Performance Highlights

- Enhanced grip for handling tools and materials
- High durability for extended wear
- Maintains dexterity for precise tasks
- Reliable hand protection

Key Protections	Abrasion Resistant, Puncture Resistant, Chemical Resistant
