

Non-Asbestos Clutch Facing

These non-asbestos clutch facings are engineered for reliable friction performance and durability. They are suitable for use in various automotive applications within clutch systems.

Product Overview

High-Performance Non-Asbestos Clutch Facing

These non-asbestos clutch facings are engineered to deliver reliable friction performance and long-term durability in demanding automotive clutch systems. Designed for versatility, the range covers various vehicle requirements, ensuring consistent engagement and power transfer. Each unit is precisely manufactured to meet strict operational standards for safety and efficiency.

Product Specifications

Available Model Codes

- FD-018
- FD-1606
- YSNA-003
- YSNA-005
- YSNA-012
- YSNA-02
- YSNA-78
- YSNA-98

Material Type

Non-Asbestos • Friction Material
