

# Non-Sparking Beryllium Copper File Set

This set features non-sparking files suitable for use in industries such as petroleum, chemical, power generation, railroad, and mining. The files are made from beryllium copper and come with plastic handles for a secure grip.

## Overview

### Safety-First Tooling

This non-sparking and non-magnetic file set is engineered for safety in high-risk environments, including the petroleum, chemical, power generation, railroad, and mining industries. Crafted from durable beryllium or aluminum copper alloys, these files are designed to effectively prevent sparks during operation. The set includes both flat and round profiles, offering versatility for various professional applications.

## Technical Specifications

### Available Sizes

- 200x22mm
- 250x23mm
- 300x25mm
- 350x30mm

### Material Options

Aluminum Copper, Beryllium Copper

### Available Colors

Nature, Green

## Material Properties

### Material Performance Table

Material	Hardness (HRC)	Tensile Strength (kgf/mm)
Aluminum-Bronze	25	75-85
Beryllium-Bronze	35	105-120

## Certifications & Quality

### Certifications

ISO9001 • UKAS

### Key Features

- Non-sparking
- Non-magnetic
- Long service life

## Customization Services

### Manufacturing Services

- Custom size requests accepted
- Custom manufacturing based on provided images
