

# Non-Sparking Brass Scaling Hammer, 0.3kg

This scaling hammer is made from a copper alloy. It is designed to prevent sparks in environments with flammable materials.

## Product Overview

### Professional Non-Sparking Scaling Hammer

This 0.3kg scaling hammer is engineered for safety in hazardous environments where flammable or explosive materials are present. Constructed from high-quality copper alloy, it effectively prevents sparking during use. The tool is designed for durability and precision, making it an essential instrument for industries such as petroleum, chemical processing, mining, and power generation.

## Technical Specifications

### Hardness (HRC)

**25 HRC**

Al-Bronze

**35 HRC**

Be-Bronze

### Tensile Strength

| Material         | Strength       |
|------------------|----------------|
| Aluminum-Bronze  | 75-85 kgf/mm   |
| Beryllium-Bronze | 105-120 kgf/mm |

### Available Weights

- 0.23kg
- 0.3kg
- 0.4kg

### Material Composition

Aluminum Copper, Beryllium Copper

### Handle Material

Fiberglass

## Compliance & Usage

### Certifications

ISO 9001 • UKAS

### Primary Applications

Petroleum Industry, Chemical Industry, Power Generation, Railroad, Mining

### Available Colors

Nature, Green
