

Non-Sparking Shears Cutter Pliers Scissor

This non-sparking tool is essential for use in potentially explosive environments such as petroleum, chemical, and natural gas industries. It is also crucial for machinery manufacturing and maintenance.

Product Overview

Safety-First Cutting Solution

These non-sparking shears and pliers are engineered for high-risk environments where flammable or explosive substances are present. Constructed from specialized alloys, they effectively eliminate the risk of ignition during operation. This versatile tool combines sharp, precise cutting blades with robust gripping capabilities, making it an essential safety asset for critical industrial maintenance and repair tasks.

Technical Specifications

Tool Configuration

- Shears Cutter
- Pliers Scissor

Material Options

Aluminum Bronze, Beryllium Bronze

Applications

Suitable Industries

Oil and Gas • Mining • Chemical Processing

Key Features

Safety Characteristics

- Non-sparking construction
- Ignition prevention
- Precise cutting blades
- Versatile gripping action
