

# Non-Sparking Square Shovel

This square shovel is designed for use in environments where flammable or explosive materials are present. Constructed from non-ferrous metals, it ensures safety by preventing sparks when striking hard surfaces.

## Product Overview

### Safety-First Design

The Non-Sparking Square Shovel is engineered specifically for hazardous environments where flammable vapors, liquids, or dusts are present. Constructed from specialized non-ferrous alloys like aluminum bronze or beryllium copper, this tool prevents sparking upon impact. Its square blade design is optimized for efficient scooping and handling of bulk solids such as grain, coal, and industrial materials.

## Key Features

### Safety Attributes

Non-Sparking • Non-Ferrous • Explosion-Proof

### Primary Industries

Petrochemicals, Oil & Gas, Mining, Chemical Industry, Pharmaceutical, Aerospace, Defense, Fire-Fighters

## Technical Details

### Material Composition

- Aluminum Bronze
- Beryllium Copper Alloys

### Handle Materials

- Wood
- Fiberglass

### Blade Shape

Square
