

Nougat Cake Pillow Packaging Machine

This high-speed pillow-type packaging machine is designed for nougat cakes and similar confectionery. It features an automated feeding system, adjustable sealing temperature, and precise cutting mechanism to ensure efficient and consistent packaging.

Overview

High-Efficiency Pillow Packaging Solution

This high-speed pillow-type packaging machine is engineered for precision and reliability in commercial environments. It features dual-frequency conversion control for optimized bag length settings, significantly reducing material waste and production time. With its independent PID temperature control and high-sensitivity optical color tracing, it ensures consistent, high-quality seals for a wide variety of product types.

Key Features

Operational Benefits

- Time and film saving via single-step bag length setting
- Easy and quick interface operation
- Clear failure display for maintenance
- Position stop function to prevent film sticking

Control System

Dual frequency conversion, Software-based control, Self-failure diagnosis, Digital input

Technical Specifications

Performance Metrics

1 Dual

Frequency Control

1 Independent PID

Temperature Control

Sensor Accuracy

Yes

Applications

Suitable Products

Biscuit, Bread, Egg roll, Ice cream, Soap, Tissues, Hardware, Paper box products
