

Nylon Agricultural Machinery Pulleys

These nylon pulleys are designed for various agricultural machinery applications. The pulleys feature robust metal frames and smooth-rolling nylon wheels, ensuring efficient and reliable performance.

Product Overview

Durable Nylon Pulleys for Agricultural Machinery

These high-performance nylon pulleys are engineered specifically for demanding agricultural machinery applications. Featuring robust metal frames paired with smooth-rolling nylon wheels, they ensure efficient power transmission and reliable operation. Designed to handle various load requirements, these components are ideal for integration into lifting, tensioning, and transmission systems.

Technical Details

Construction Materials

- Nylon (Wheel)
- Metal (Frame)

Available Model Numbers

P1034, P1341, P1342, P1345

Applications

Primary Applications

Lifting Systems • Tensioning Systems • Power Transmission • Agricultural Machinery
