Product Overview

High-Performance Paracord

This versatile paracord is engineered with a 32-carrier diamond braided construction, ensuring superior durability and longevity. Designed to withstand harsh environments, it features excellent resistance to aging and corrosion. It is an ideal solution for demanding professional applications including fishery, navigation, and mining operations.

Technical Specifications

Performance Metrics

550 lb

Minimum Break Strength

Key Features

Aging Resistant • Corrosion Resistant • Quick Drying • Rot Resistant • Mildew Resistant

Material Composition

Polyester Sheath, 100% Nylon Inner Strands

Construction

32 Carrier Diamond Braided

Applications & Safety

Intended Industries

- Fishery
- Navigation
- Mining

Safety Warnings

Warning Category	Description
Overhead Lifting	Do not use for overhead lifting.
Load Limits	Do not exceed working load limit.
Shock Loads	Jerk or stress loads can reduce strength by 33%.
Knots	Knots reduce rope strength by 40%.
