

## Off-Grid Solar Power System 1kW-20kW

This off-grid solar power system is suitable for both residential and commercial applications. It provides a reliable power source by storing excess energy in batteries, making it ideal for remote locations and areas with frequent power outages.

### ADDITIONAL IMAGES

### Product Overview

A complete off-grid power solution including high-efficiency solar panels, battery storage, and inverter units.

### Comprehensive Off-Grid Power Solution

This off-grid solar power system provides a reliable and sustainable energy source for both residential and commercial applications. Ranging from 1kW to 20kW, the system operates independently of the utility grid, making it an ideal choice for remote locations or areas prone to power outages. Engineered for durability, each system includes high-efficiency solar panels, a charge controller, battery storage, and an inverter to convert energy for daily use.

## Technical Specifications

Schematic representation of the energy flow from solar panels to load through controllers, batteries, and inverters.

Scalable solar power solutions designed for diverse energy requirements from 1kW to 20kW.

### Core Components

- Solar Panels
- Inverter
- Charge Controller
- Battery Storage

### Available Capacities

1kW, 3kW, 5kW, 8kW, 10kW, 15kW, 20kW

## Compliance and Warranty

### Electronics Warranty

**3 Years**

Inverter and Battery

### Photovoltaic Warranty

**25 Years**

Solar Panels and Accessories

### Quality Certifications

TUV, CE, ISO, CQC, SGS

## Operational Metrics

### Annual Production

18000 sets/year
