

Off-Road Bias Tire for Industrial Vehicles

This bias tire is designed for traction and long wear in off-the-road applications. It features a solid centerline section for extended wear and a smooth ride.

Product Overview

High-Traction Industrial OTR Tire

This off-road bias tire is specifically engineered for heavy-duty industrial applications, including mining and construction. It features a robust bias-ply design that enhances stability and load-carrying capacity in demanding environments. With a focus on durability, the tire incorporates a deep tread pattern and a specialized compound to ensure reliable performance and an extended service life.

Performance Features

TL510

Traction Bias Tire with Longer Wear

- Solid centerline section for longer wear and smooth ride
- Deep tread for long wear and improved traction
- Unique compound for long original tread life and advanced cut resistance
- Tough construction for enhanced impact and cut resistance support

The TL510 features a deep tread and solid centerline for maximum wear resistance and traction.

Key Performance Benefits

- Solid centerline section for extended wear and a smooth ride
- Deep tread pattern for improved traction and longevity
- Unique compound formulated for advanced cut resistance
- Tough construction designed to enhance impact resistance

Technical Specifications

Design Type

Bias-Ply • Off-The-Road (OTR) • Traction Bias

Tire Size

18.00-25

Ideal Applications

Mining, Construction, Industrial Vehicles, Heavy-Duty Off-Road

Durability Metrics

Durability & Resistance

1 High

Cut Resistance
