Product Overview

Engineered for Reliability

This oil cooler protective cover is specifically designed for power generation applications, providing a robust enclosure for the oil cooler unit. It is engineered to withstand harsh operating environments, ensuring efficient cooling performance and protecting the cooler core from external damage. The design features multiple mounting points for secure installation in electric power systems.

Compatibility

Compatible Engine Models

- 1006-6
- 1006-60
- 1006-60T
- 1006-60TA
- 1006-6T

Technical Details

Design Features

- Internal fluid flow channels
- Multiple bolt holes for secure mounting

Material & Build

Cast Metal, Durable Construction

Identification

Reference Numbers

Identifier Type	Value
Primary Part Number	00000LF920207080020
Secondary Identifier	00002490020070100020
Casting Mark	027
