

Oil-Filled Radiator Heater

This oil-filled radiator heater provides efficient and consistent heating for indoor spaces. It utilizes a diathermic oil reservoir, which is heated by an internal electric element, circulating heat through the radiator fins.

Product Overview

Efficient Heating Solution

The CHH-08-B oil-filled radiator heater provides consistent and reliable warmth for indoor spaces through its diathermic oil reservoir system. Designed for versatility and comfort, it features multiple power settings and an adjustable thermostat to maintain your desired temperature efficiently. With built-in safety mechanisms like overheat protection and automatic shutoff, this unit offers both performance and peace of mind for daily use.
